RAPID7 PRODUCT CONSULTING

Application Security Deployment Services
For Rapid7 InsightAppSec or AppSpider

Modern networks are no longer comprised simply of servers and desktops; remote workers, cloud and virtualization, and mobile devices mean your risk exposure is changing every minute. You need an application security solution as dynamic as your company; one that is quickly deployed and provides rapid time-to-value.

Rapid7's Product Consulting team is comprised of field experts with years of security experience, helping you extract the maximum value of our application security solutions. Our deployment services are tailored to operationalize your application security program, augmenting your deployment with product configurations, process automation, and reporting workflows. Working directly with your team and your current tools—onsite if you choose, we help you align InsightAppSec or AppSpider with industry best practices.* Our deployment services make the best use of valuable budget dollars and position you to maximize the success of your application security program.

Rapid7 Deployment Packages

Our model provides several deployment packages that have been carefully constructed based on the size of your environment, automated scanning needs, business-aligned configuration and reporting, and integrations with other solutions to enable end-to-end application security.

DEPLOYMENT PHASES	Quick Start	Basic	Standard	Enhanced	Premium	Custom
Length of Deployment	1 day	Up to 2 days	Up to 3 days	Up to 5 days	Up to 10 days	Custom
Onsite or Remote	Remote	Remote	Either	Either	Either	

All deployment packages can be delivered as onsite services with the exception of Quick Start and Basic. Additional charges for travel and expenses will apply.
